

## **Resolution on the abolition of the US and all other foreign military bases in the world**

---

Page 1 of 1

The III ELP Congress held in Paris demands the immediate withdrawal of all US military bases in Europe and all around the world. We don't want any foreign military bases anywhere.

These military bases are part of a security system based on intimidation that risks human and shared security.

Preventive war and the possibility of using force without a UN mandate –both concepts reaffirmed in the last NATO summit in Lisbon-, require military deployment in order to project this power in any part of the world.

These US military bases also serve to deploy weapons of mass destruction. Satellite telecommunications serve also to secure the spying network ECHELON.

US military bases play an important role in the operation of CIA flights. It has been proven that planes used them during secret and illegal operations to transport prisoners with the complicity of some European governments, as appeared in recent Wikileaks documents.

The Obama administration still defends like its predecessor, a role of dominance which we consider unacceptable because it endangers human, democratic and shared security.

The EL Congress reaffirms its commitment to the peace movement around the world in demanding the closure of all US and all other foreign military bases worldwide.

The ELF Congress suggests to all the party members to coordinate European actions against US and all other foreign military bases in Europe.
