

# MŁODZI SOCJALIŚCI

Polish **Young Socialists** wish to express their protest against the recently signed preliminary agreement between the Polish and American governments regarding the construction of U.S. military bases in Poland. In our opinion this project is another step towards a new arms race and turning Poland into a object of American imperial policy. U.S. military bases present a threat to the safety of Polish citizens, a majority of whom does not support the government's decision.

**Young Socialists** have been, during the recent years, leading a campaign against locating U.S. military bases in Poland. This campaign included manifestations, public discussions, seminars and conferences organized in cities and smaller towns all over the country. This has given us a clear view - all over the country there is a strong disapproval of the idea of building American military installations on Polish territory. The Polish government and president have made their decision with no regard to the voice of their own citizens.

The signing of the preliminary agreement is a call for a radical mobilization for the Polish anti-war movement. As always **Young Socialists** will take an active part in its actions. As this is a matter of not only Poland but all of Europe we hope for the help and support of our European comrades and friends.
