PRESS STATEMENT

19 November 2026 | For immediate release

European Left demands concrete EU action over Myrotvorets listings of MEPs

The Party of the European Left (European Left) expresses its solidarity with Danilo Della Valle, the entire Five Star Movement (M5S) delegation in the European Parliament, and all other MEPs listed by the controversial Ukrainian Myrotvorets website.

The inclusion of elected representatives in a database that publishes personal information and allegations about individuals raises serious concerns about their safety, freedom of expression and ability to exercise their democratic mandate without intimidation.

This is not an isolated controversy. In 2016, the OSCE raised concerns about the publication of journalists' personal data; in 2021, the European Parliament called on Ukrainian authorities to prohibit the activities of websites including Myrotvorets; and in 2024, the European Commission confirmed that it had repeatedly raised concerns about the disclosure of EU citizens' personal information with Ukrainian counterparts.

Walter Baier, President of the Party of the European Left, said:

"No elected representative should face intimidation for parliamentary work, political disagreement or advocacy of diplomacy and peace. The EU must defend democratic rights consistently, without political double standards."

The European Left takes note of European Parliament President Roberta Metsola's reported commitment to raise the matter with Ukrainian counterparts. Diplomatic engagement is a necessary step, but it must lead to concrete results. The distinction between a nongovernmental website and Ukrainian state authorities must be respected; direct government control of Myrotvorets has not been established.

The European Left calls on EU institutions to:

- Assess potential risks and ensure appropriate protection for affected MEPs.
- Engage with Ukrainian authorities to address the listings and seek removal of any unlawfully disclosed personal information.
- Explain the results of previous interventions concerning Myrotvorets and set out the next steps, including follow-up to the current diplomatic contacts.

Supporting Ukraine's sovereignty and defending the right to advocate diplomacy and peace are not mutually exclusive. The European Union must demonstrate that its democratic principles apply to everyone.
